SUMMARY

Detail-oriented Software Engineer with extensive experience in front-end development and project management, specializing in building user-centric web applications using React, JavaScript, and modern web technologies. Proven track record in delivering high-quality features, improving user experience, and enhancing accessibility. Seeking a challenging role where I can leverage my skills in responsive web design, accessibility, and team collaboration to drive innovation and excellence.

SKILLS AND TECHNOLOGIES

- **Languages:** HTML5, CSS3, JavaScript.
- **Technologies:** React.js, Next.js, Redux, Superbase
- **Other:** Responsive Web Design, Web Accessibility Principles, Git.

PROFESSIONAL EXPERIENCE

Software Engineer, Tech Studio Academy Apr 2024 - Jul 2024

Primarily responsible for delivering cutting-edge front-end features for our client-side applications:

- Developed the Tech Eat Web App front end to enhance convenience and user experience for students and vendors.
- Enabled vendor sign-ups to expand food options, promoting vendor engagement.
- Supported our backed team in the technical sessions providing insights on data models, and schema definition helping to unify and simplify our interfaces.
- Supporting my team across the full software development life cycle from concept, implementation, and testing.

Technologies: React, Tailwind CSS, Redux

Front End Engineer, Cargo West Dec 2023 (4 weeks)

Primarily responsible for delivering front-end features for our client-side applications:

- Developed user interfaces using React and Tailwind CSS, ensuring a responsive and visually appealing client-side experience.
- Handled state management with React Query, resulting in efficient data fetching and improved application performance.
- Collaborated effectively with backend engineers using Laravel, facilitating seamless integration and smooth data flow.
- Optimized performance, reducing load times and enhancing user satisfaction, contributing to a more efficient application.

Technologies: React, Tailwind CSS, React Query

RELEVANT PROJECTS

First Group Financials

4 Weeks

- Built a web application allowing users to take loans and invest on the platform using HTML, CSS, JavaScript, and Mad JS, facilitating financial transactions and investment opportunities.
- Designed and implemented intuitive user interfaces to enhance user experience and streamline the process of loan applications and investments.
- Collaborated with the development team to ensure seamless integration of front-end features with back-end functionalities, optimizing data handling and user interaction.
- Optimized performance and responsiveness of the application, resulting in increased user satisfaction and engagement within the 4-week development period.

Technologies: HTML, CSS, JavaScript, Mad js

Good Pay Exchange

4 Weeks

- Developed the front end of a website for buying and selling crypto and exchanging cards using HTML, CSS, and JavaScript, providing a seamless and intuitive user experience.
- Implemented responsive design features to ensure the site is accessible and functional across various devices and screen sizes.
- Collaborated with back-end developers to integrate front-end components with server-side functionalities, ensuring smooth and effective data exchange.
- Optimized the front-end performance, leading to improved load times and enhanced user engagement on the platform.

Technologies: HTML, CSS, JavaScript, PHP LARAVEL

Worldist App

Three Weeks

- Built a web app to track footsteps into every city wandered, enhancing travel documentation and user engagement.
- Implemented accessible drag and drop functionality to improve user experience and interaction.
- Focused on accessibility by integrating inclusive design patterns, ensuring the app is usable by a wider audience.

Technologies: HTML, CSS, JavaScript, React

Fast Food App

Three Weeks

- Built a web app to facilitate food ordering with pay-on-delivery functionality, enhancing user convenience.
- Implemented optimistic UI to provide users with responsive and seamless interaction during order placement.
- Designed authentication requiring only user's name to simplify login process and improve user experience.
- Managed the loading state globally across the app to ensure consistent user feedback and smooth performance.

Technologies: HTML, CSS, JavaScript, Tailwind CSS, React

Long Dist App	Three Weeks
• Developed a web app using HTML, CSS, JavaScript, and React that allows users to store and organize travel items needed for their next trip. • Designed to help users plan and remember essential items for travel, enhancing trip preparation and organization. • Enhanced the accessibility of the app by implementing inclusive design practices, making it easier for all users to navigate and utilize the application. • Completed the project within three weeks, delivering a functional tool to aid users in managing their travel preparations effectively.	
Technologies: HTML, CSS, JavaScript, React
